**CIRCULAR**

**Sub : Modified set up of Civil Wing of MPPTCL**

\*\*\*

In pursuance of the directions of the Board of Directors, the modified set up of Civil wing of MPPTCL was conveyed vide this office circular No.AS/MPPTCL/2561 dated 07.09.2012. In accordance with the modified set up, the field formations of Civil Wing have been kept under EHT and T&C wings and the prevailing system of the independent Circles / Divisions of the Civil wing has been abolished.

Full scale implementation of the modified set up will involve drastic changes in the mode of supervision and control of various ongoing Civil Engineering activities. Such changes assume greater significance in light of the fact that for the first time the company has awarded a large number of contracts under JICA loan on Turn Key basis; which will require a closer supervision of various activities and greater checks pertaining to quality control with a view to ensure that there are no slippages in terms of both time and quality. Such checks may be adversely effected incase a new set up of Civil wing is implemented in one go; for the same all of sudden is likely to throw disproportionate responsibility on field EHT formations regarding overall supervision and control of Civil Engineering activities. The matter was, therefore, reviewed and it has been decided that the complete change over to the new set up of Civil Wing may be carried out gradually with a view to ensure smooth execution of various Civil Engineering activities under JICA loan.

Considering that the turn key contracts under JICA loan are slated for completion by May / June 2014 and a further period of 3 to 4 months might be needed to pack up this activities, it has been decided that the period up to Sept. 2014 be treated as the transitional period for completely switching over from the old to new set up of Civil Wing. During this two years period, the existing system of Civil Divisions will continue and these Divisions will be kept under the administrative control of SE (EHT Constn.) Circle of the area.

Thus, the main change in the functioning of Civil wing, which is required to be made at present and to be continued upto Sept. 2014, will be that the administrative control of Civil Divisions will be shifted from Civil (H.Q) to EHT Constn. Circles. The Civil staff posted in Civil Divisions will continue to remain there till Sept. 2014 after which the new set up, as notified vide circular dated 07.09.2012, will be implemented. In the course of this transitional phase (upto Sept. 2014), Civil Engineering activities pertaining to existing EHV Sub-stations will be continued to be looked after by the field Civil Divisions. After Sept. 2014, such Civil Engineering activities will be looked after by the T&C Circles / Divisions with the help of Civil staff posted under them.

The above transitional arrangement up to Sept. 2014 has been made with a view to ensure that the sudden change in the activities of Civil Wing does not adversely affect the crucial works under JICA loan.
